HOW WE HELPED

Strategic Clarity

We partnered with DonorSync to turn their bold vision into a fully custom SaaS solution—built to simplify donation management and eliminate manual overhead for charities.

Smart Automation

From automated Gift Aid claims to real-time donor analytics, we engineered systems that do the heavy lifting—giving nonprofit teams more time to focus on impact, not admin.

Built for the change makers

DonorSync is a purpose-built platform for charities to manage the entire donation lifecycle from one place.

The goal? Remove manual data entry, improve compliance, and help nonprofits engage donors better.

Halo Digital led the full-cycle development—designing clean dashboards, automating workflows, and embedding security at every level. What resulted was a modular, scalable product ready to serve local and global charities alike.

We didn't just build software. We built digital confidence for the nonprofit sector.
