HOW WE HELPED

Spiritual Clarity

We partnered with Pilgrim to transform their vision into a powerful mobile app—designed to guide millions through every step of Hajj and Umrah with confidence and ease.

Smart Assistance

From real-time Tawaf tracking to AI-powered guidance, we built intelligent tools that help pilgrims focus on their spiritual journey—while the app handles the details.

Built for the faithful journey

Pilgrim is a purpose-built app to guide Muslims through one of life's most important journeys—Hajj and Umrah.

The goal? Provide step-by-step support, reduce confusion, and make the pilgrimage experience smoother, safer, and more meaningful.

Halo Digital led the full-cycle development—building clean interfaces, embedding AI-powered support, and scaling with secure cloud infrastructure. What resulted was a reliable companion app trusted by pilgrims worldwide.

We didn't just build an app. We built digital guidance for the sacred journey.
